EdgeORE

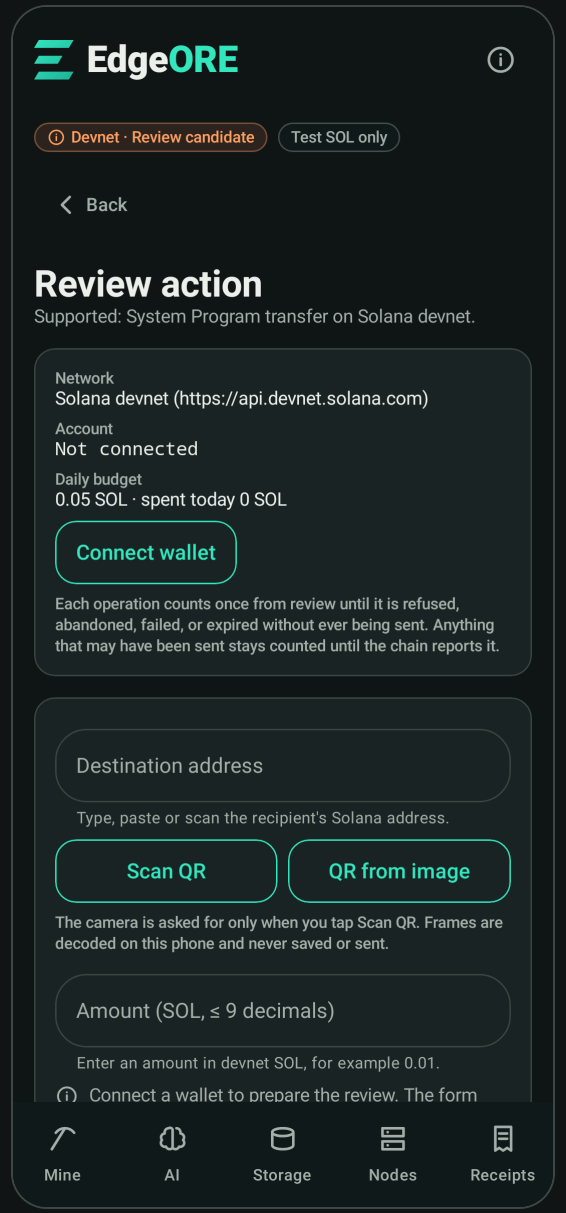

Every wallet action on Seeker produces a signed receipt you can verify offline — including the ones you refuse.

Your Edge. Your AI. Your Proof. · Retrospective + dApp Store launch package · 12 Oct 2026 (submissions closed 8 Oct)

The problem

1. You approve bytes you never see.
2. After a timeout: sent, failed or pending? The app may resend.
3. No artifact for “what did I sign, and when”.
4. Two apps, two stories.
5. “Success” is a label, not a proof.

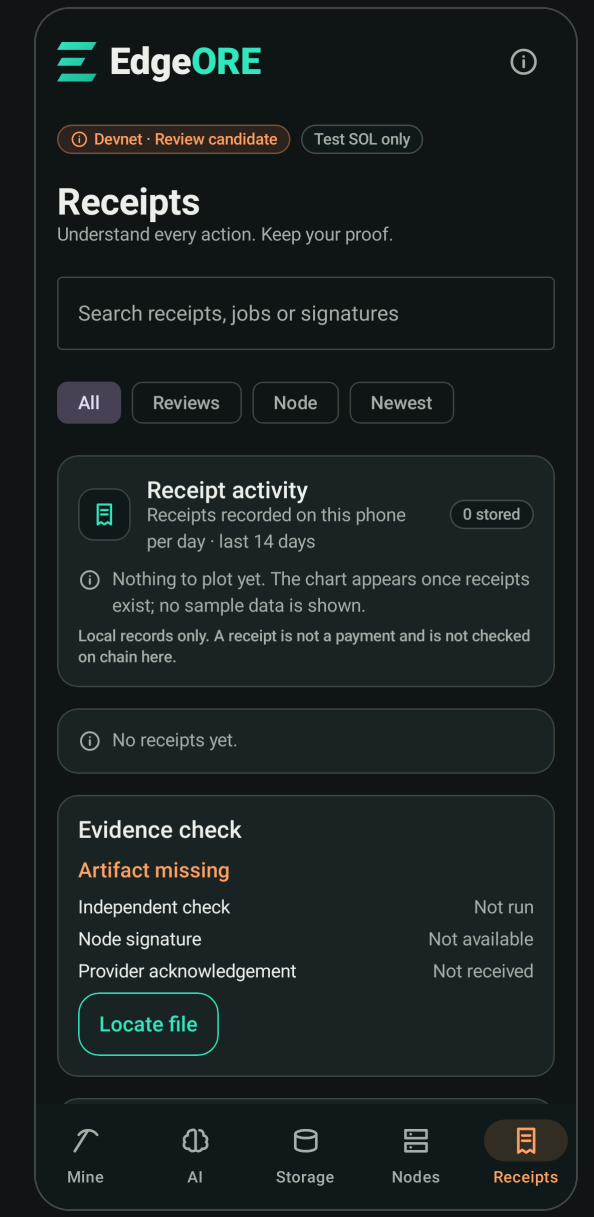

The trust spine

```
Review bytes → Approve exact message → Sign in wallet
→ Verify returned bytes → Submit separately → Export receipt
```

Different bytes back: refused. Network gone after signing: observe, never auto-resend. The JVM checker verifies the integrity of signed receipt contents.

Wallet journey IMPLEMENTED_UNVERIFIED · device run NOT_RUN

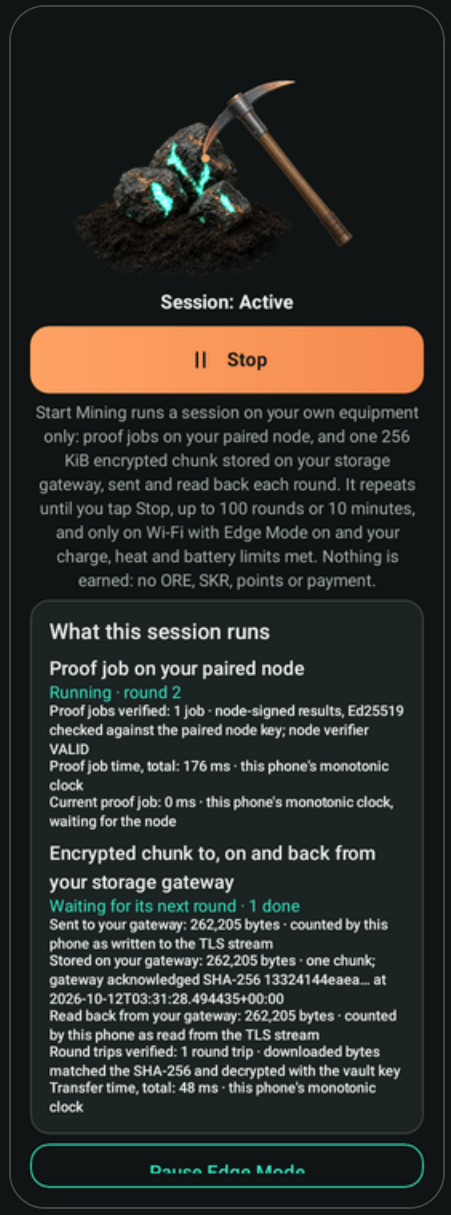

Mine: Start Mining

A contribution session on the owner's own node and gateway: Groth16 proof jobs + 256 KiB vault-sealed chunk round trips. Pickaxe swings only while ACTIVE.

Dev-machine e2e: 5 proof jobs + 5 round trips verified; checker accepted 6 receipts.

IMPLEMENTED_UNVERIFIED · Nothing is earned: no ORE, SKR, points or payment.

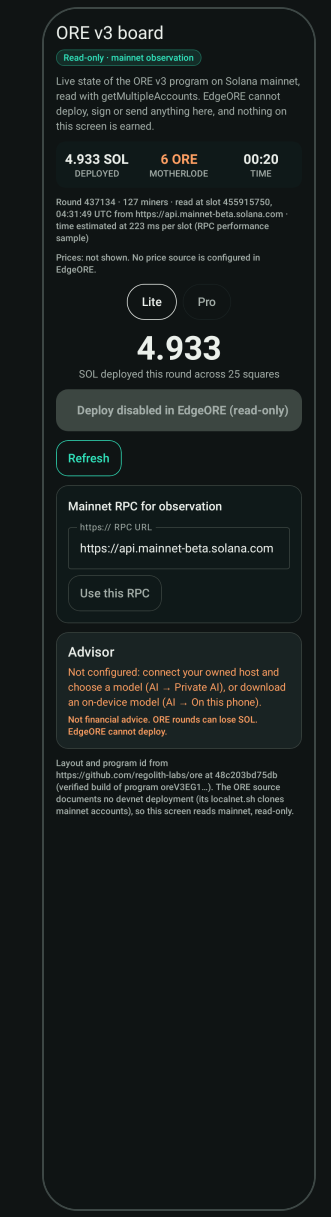

ORE v3 board — read-only

Live Board + Round accounts over public mainnet RPC: 25 squares, per-square SOL, motherlode. Text-only advisor quotes snapshot values; not financial advice.

No deploy, checkpoint or claim path exists.

IMPLEMENTED_UNVERIFIED · layouts from regolith-labs/ore @48c203bd

SKR

Mechanic	Status
Burn-to-mine epoch pool	DESIGN
Pro-Mine stake	DESIGN
Daily chests	DESIGN
Draws	DESIGN (needs legal review)
Epoch airdrop pool	DESIGN — no size, nothing allocated

Live today: nothing. The app does not read SKR mint state.

Evidence @ 84a788cbd926

Suite	Result
Android JVM	330 tests · 325 passed · 5 skipped
Receipt checker	14 passed
Gateway	17 passed
Extension kit	22 passed
Build-policy tests	12 passed
Manifest-checker tests	9 passed
Lint · release manifest	clean · PASS
Seeker device, wallet, video	NOT_RUN

Counts listed separately, never summed. minSdk 26 · no Play Services / analytics / tracking SDKs · CAMERA for QR only.

Roadmap → dApp Store

- Device gates on Seeker — NOT_RUN
- Detekt · ktlint · MobSF — DESIGN
- Release signing · bundletool — BLOCKED on owner key
- dApp Store listing — NOT_RUN
- BLE / mesh / WebRTC / libp2p — deferred

Not production-ready. Devnet transactions only. No rewards, no token. Built by CodesbyFebin.
